Preschool Mom 30-Weeks 4-Days/Week
Number of the Week Overview:

Number of the week is a 30-week program that covers 4 days/week. This no-prep, print-&-go set gives students number themed activities for each day. Number of the week coordinates perfectly with our Letter of the Week program, however it can be used independently as well. (Number 0 is also included as an option, which would make the curriculum span 31-weeks)

Monday:

**Number Chart:** Introduce students to the number of the week with a colorful chart that features a ten frame and ASL hand signs.

**Number Mat:** Students can use playdough to form and frame the number. Practice making the hand signs.

Tuesday:

**Number Handwriting:** Students work on early handwriting skills as they practice writing the number as the text size slowly gets smaller. A drawing prompt encourages students to draw and count. Practice making ASL hand signs.

Wednesday:

**Number Maze:** Students dab their way through the number maze. Markers or stickers can be used in place of bingo daubers. Encourage students to say the number aloud each time they dab. Practice making ASL hand signs.

Thursday:

**Number Activity Page:** Students complete a variety of tasks and color in a star for each activity they finish. This activity page includes hands on prompts such as; build a tower, clap and count.... etc. Practice making ASL hand signs.

Optional Reward Bracelets in Appendix
Appendix:

**Number Bingo:** A beautiful, full color game of Number Bingo! This set includes 8 different bingo cards you can use to wrap-up your year of numbers.

**Number Bracelets:** A fun way to celebrate your student’s accomplishments each week. Print on colored paper and provide students with small stickers they can use to stick on the correct number.
